

Young Engineer of the Year Award Criteria & Nomination Form

This award recognizes a young ISPE member who has made outstanding contributions to the Engineering Profession and the community during the early years of one's career. Winners will be considered for nomination to NSPE for the New Professional Award. All award winners are recognized at the ISPE Annual Conference.

Criteria / Method of Selection

Any licensed Professional Engineer (PE) or Engineering Intern (EI) who is also an ISPE member in good standing and 35 years of age or younger as of January first in the year the award is to be presented is eligible for nomination. Although EI's can be nominated, PEs will be given greater consideration.

The nomination shall be made either by an ISPE chapter or an individual ISPE member in good standing. Only one submission per chapter or individual member shall be allowed. Current officers and directors of ISPE and NSPE are ineligible.

The ISPE Honors and Awards Committee makes the selection of the winner, weighing the following particulars:

- 10 points - Collegiate educational and extra-curricular achievements
- 20 points - Professional society activities, positions held, and achievements
- 15 points - Technical society activities, positions held, and achievements
- 15 points - Community and humanitarian activities, positions held, and achievements
- 15 points - Career positions and responsibilities after completion of Baccalaureate degree
- 25 points - Engineering career achievements

100 Potential Points

Address: _____

Licensure Status (include all states and license numbers):

Nomination Submitted by: _____

Nominator Phone: _____

Nominator Email: _____

Collegiate educational and extra-curricular achievements

Include undergraduate and post-graduate degree(s) with institution, major(s), and date for each degree; honorary societies; scholastic awards; organizations in which the nominee participated, and any other activities deemed relevant to this category.

Professional society activities, positions held, and achievements

These should include any non-technical organizations (e.g., NSPE, SWE, NSBE, and SHPE) at the national, state, and local level. Include affiliations, positions held, awards received, notable achievement, etc.

Technical society activities, positions held, and achievements

Representative organizations in this category include the founding societies (e.g., ASCE, ASME, and IEEE) and any others for which the nominee's technical prowess is applicable. Include affiliations, positions held, awards received, notable achievement, etc.

Community and humanitarian activities, positions held, and achievements

This category includes a wide swath of organizational activities, including service organizations, scouting, governmental service, religious organizations, and others intended to assist people and/or improve quality of life. Include affiliations, positions held, awards received, and noteworthy achievements with explanation of each's significance in the activity, etc.

Career positions after completion of Baccalaureate degree

Include each employer, location, dates of employment. Describe nominee's position(s) with each employer and your responsibilities, e.g., number of persons supervised, size of budget managed, and types of duties.

Engineering career achievements

Describe nominee's accomplishments in each employment experience and the significance of them. Include customer/client feedback that reflects nominee's value. Provide information about patents either awarded or pending, awards for work performed or results achieved, and any other information that enhances the nominee's worthiness for this award. Note this is the most significant category for scoring.
